

Steps to Upload a Flutter Project to GitHub

This document summarizes the steps performed to upload the Flutter project 'jewelleryflutterapp' from a local computer to a GitHub repository.

- 1 Open Command Prompt and navigate to the project folder.
- 2 Initialize a Git repository using: `git init`
- 3 Add all project files to Git using: `git add .`
- 4 Commit the files with a message using: `git commit -m 'Initial commit'`
- 5 Create a new repository on GitHub with the desired repository name.
- 6 Connect the local project to the GitHub repository using: `git remote add origin`
- 7 Rename the default branch to main using: `git branch -M main`
- 8 Push the project to GitHub using: `git push -u origin main`
- 9 If the repository location changes, update the remote URL using: `git remote set-url origin`
- 10 Verify that all files appear correctly in the GitHub repository.
